

SOCIII Subscriber Data Rights Policy

sociii.ai · Effective August 28, 2026

1. Purpose and Scope

This Subscriber Data Rights Policy ("SDRP") governs the rights of subscribers ("you") with respect to personal data, vault data, and session data processed by SOCIII AI Digital Workers on the SOCIII platform. It supplements the SOCIII Privacy Policy and applies to all subscribers globally.

This policy covers: data stored in your SOCIII Vault; session data generated during your use of AI Digital Workers; outputs generated by AI Digital Workers based on your inputs; and audit trail records created during regulated worker interactions.

2. Data You Own

2.1 Your Vault Data

Your SOCIII Vault is a personal, encrypted data repository. You are the data owner of all content you upload, configure, or store in your Vault, including documents, files, and templates you upload; preferences, configurations, and workflow rules you set; historical records and outputs from worker sessions you initiate; and credentials and professional information you provide for worker personalization.

2.2 Your Session Data

Each conversation with a Digital Worker generates session data. You own the content of your sessions. SOCIII retains session metadata (timestamps, worker ID, session ID) for platform operation and security.

2.3 What SOCIII Does NOT Own

The substantive content of your prompts and worker outputs; documents you upload for processing; configured rules you create in your personal Tier 3 preferences.

3. How Workers Access Your Data

3.1 Four-Tier Data Access Framework

SOCIII operates a four-tier rules stack that governs how Digital Workers access and use your data:

- Tier 0 — Platform Safety: non-negotiable safety and legal compliance rules applied to all workers
- Tier 1 — Industry Regulations: regulatory rules specific to the worker's vertical (e.g., HIPAA, FAA, FERPA)
- Tier 2 — Company/Creator Policies: rules set by the worker creator governing scope and behavior
- Tier 3 — Subscriber Preferences: your personal preferences, accessible only to workers you authorize

3.2 Data Minimization

Digital Workers access only the data necessary for the specific task you request. Workers do not have blanket access to your entire Vault — access is scoped per session and per task type.

3.3 Cross-Worker Data Sharing

Your Vault data can be shared across multiple workers within your account (the "Shared Vault" architecture). Cross-worker data access is subject to your authorization and the applicable Tier 1 and Tier 2 rules. You may restrict specific workers from accessing specific Vault data categories in your account settings.

4. Your Rights as a Subscriber

4.1 Right to Access

You may request a complete export of your Vault data, session history, and account data at any time via account settings or by emailing privacy@sociii.ai. Exports are delivered in JSON or PDF format within 30 days.

4.2 Right to Correction

You may correct inaccurate personal data in your Vault or profile at any time via account settings. For corrections to audit trail records (which are immutable by design), contact legal@sociii.ai with documentation.

4.3 Right to Deletion

You may request deletion of your Vault data and account at any time. Deletion is subject to legal retention requirements (e.g., financial records must be retained for 7 years under US tax law); regulatory retention requirements for regulated verticals (e.g., HIPAA requires 6-year BAA retention); and active subscription agreements (data is retained for 90 days after subscription cancellation before deletion). Immutable audit trail records cannot be deleted but can be suppressed from your view upon request.

4.4 Right to Portability

You may export your Vault data in a machine-readable format (JSON). Worker session outputs are exportable as PDF or plain text. Submit portability requests via account settings or privacy@sociii.ai.

4.5 Right to Restrict Processing

You may instruct specific workers to not use your historical session data for personalization. This is configurable per worker in your Vault settings. Note: restricting personalization may reduce worker effectiveness.

4.6 Right to Object to Automated Decisions

If a worker makes a recommendation or determination that significantly affects you (e.g., a compliance assessment, a credit-related output), you have the right to request human review. Contact legal@sociii.ai with the session ID and nature of the decision.

5. Data Used to Improve the Platform

SOCIII may use anonymized, aggregated session data to improve platform performance and worker accuracy. This data cannot identify you. We do not use the substantive content of your sessions to train AI models without your explicit, separate written consent. You will never be automatically enrolled in AI training data programs.

6. Regulated Vertical Data (HIPAA / PHI)

If you use a HIPAA-regulated worker, additional protections apply: a Business Associate Agreement (BAA) is required before receiving any output containing Protected Health Information (PHI); PHI stored in your Vault is encrypted at rest with AES-256 and access-logged; PHI is never used for platform improvement or analytics; you may request a PHI accounting of disclosures under 45 CFR §164.528; and PHI session data is retained for a minimum of 6 years per HIPAA requirements.

7. Third-Party Worker Creators

Many workers on the SOCIII marketplace are created by independent creators, not SOCIII. When you use a third-party worker: the creator has configured the Tier 2 rules governing worker behavior; the creator cannot access your personal Vault data or session history; the creator receives only anonymized usage statistics (e.g., session count, subscriber count); and SOCIII's Tier 0 safety rules apply to all third-party workers regardless of creator configuration. If you believe a third-party worker violated your data rights, report it to legal@sociii.ai.

8. Data Breach Notification

In the event of a security incident affecting your subscriber data, SOCIII will notify you by email within 72 hours of confirming a breach affecting your data (GDPR standard applied globally as our baseline), describe the categories of data affected, the likely consequences, and the measures taken, notify relevant supervisory authorities as required by applicable law, and provide a dedicated incident response contact for your questions.

9. Retention After Subscription Cancellation

When you cancel a subscription: you retain access to export your data for 90 days after cancellation; after 90 days, Vault data associated with the cancelled subscription is deleted; audit trail records required for regulatory compliance are retained per the applicable retention schedule; and account-level data (name, email, billing history) is retained for 7 years for tax and legal compliance.

10. Contact and Complaints

To exercise your rights under this policy: privacy@sociii.ai

For legal and compliance matters: legal@sociii.ai

Postal: SOCIII, Inc., 131 Continental Dr, Suite 305, Newark, DE 19713

For EEA/UK users: you may lodge a complaint with your national data protection supervisory authority if you are not satisfied with our response.
